

Neesarg Darji

Senior Flutter Developer

+91 74050 69568 | nisd997@gmail.com | [LinkedIn Profile](#) | [Portfolio](#)

5+ years shipping production iOS and Android apps in healthcare and e-commerce. Own architecture, coding standards and releases, with a focus on data-driven crash reduction and app stability.

Technical Skills

- Flutter (iOS & Android), Dart, REST APIs, Firebase
- Architecture & state: MVVM, Clean Architecture, Bloc, Provider, GetX, Riverpod, get_it/injectable
- VoIP, FCM, GoRouter & deep linking, GraphQL, payment gateways, real-time chat
- Analytics (Firebase, Mixpanel), Luciq (Instabug), Crashlytics, Shorebird, CI/CD
- AI & agents: Google ADK (working knowledge), Gemini, tool/function calling, RAG
- AI-assisted development: Claude Code, OpenAI Codex, Google Antigravity

Professional Experience

CodeTrade India Pvt. Ltd. | Senior Flutter Developer | 2021 – Present

- Lead Flutter development on client projects in healthcare, e-commerce, e-learning, fitness and travel (MLMT).
- Set up MVVM project structure across apps using Bloc, Provider and GetX.
- Built chat, video consultation and VoIP calling on iOS, with FCM-based calls and notifications on Android.

AL OBEIKAN – Healthcare Platform (Service-Based Project)

- Built and shipped 11+ connected apps for patients, doctors, care providers, ambulance crews and admins.
- Built patient medical history, diagnosis charts and secure access to medical reports.
- Implemented incoming calls with VoIP push on iOS and FCM on Android.
- Connected the ambulance and doctor apps so both sides work on the same patient case.
- Built apps for pharmacy platforms and customers with e-prescriptions, delivery and HyperPay.

EXTRA – E-Commerce App

- Re-developed and stabilized a bilingual (English/Arabic) retail app across cart, checkout and payments.
- Audited the app for performance, stability and code quality, and planned a phase-wise restructuring.
- Restructured all 26 modules into clean architecture with Bloc/Cubit and a single Dio network layer.
- Analyzed 5.3M crash reports in Luciq (Instabug) and found 71% were network drops, not real crashes.
- Fixed the splash-screen crash behind 25% of all reports; one fix pass cleared 116K crashes for 35K users.
- Defined coding and crash-handling standards; review crashes daily and track KPIs against benchmarks.
- Integrated the Horizon data platform for data science, tracking the shopping journey from product to order.
- Rolled out Shorebird code push and CI/CD pipelines.

MKAT – Ticketing App

- Built a support ticketing app where users raise tickets with voice notes and images and track them to closure.
- Added event booking, Razorpay payments and a learning video library.
- Set up Bloc architecture, FCM notifications, Crashlytics and multi-environment builds.

Shala Yoga – Fitness App

- Built a subscription app for structured yoga programs and classes.
- Added instructor chat, video lessons and a rewards system to keep users engaged.

Open edX – E-Learning App

- Built a mobile client for the Open edX platform with course outlines, programs, discussions and handouts.
- Added video lessons (YouTube and hosted video) and in-app rendering of HTML course units.

CodeTrade India Pvt. Ltd. | Flutter Intern | 6 Months, 2021 – built UI screens and navigation flows.

Baytech Services | Freelance – built a Flutter Web site with quote requests and a chatbot (baytechservices.com).

Education

B.E. Computer Engineering | SAL Institute of Technology & Engineering Research, Ahmedabad
CGPA: 8.28 | 2021
